What is an outdoor telecom enclosure?

Our outdoor telecom enclosures support a wide range of telecommunications and infrastructure needs: Fiber Optic Networks: From compact fiber distribution units to high-capacity data center enclosures like the AP-Data with six slack frames, our cabinets manage dark-fiber volumes with organized cable management and secure slack storage.

Who makes outdoor Telecom cabinets?

Since 1989, we've manufactured outdoor telecom cabinets in America's Heartland, providing telecommunications companies, utilities, and network operators with BABA-compliant solutions that protect critical equipment from the harshest environmental conditions.

Where are outdoor Telecom enclosures made?

Every outdoor telecom enclosure we manufacture is designed, fabricated, and assembled entirely in the USA. Our commitment to American manufacturing means you receive consistent quality, faster lead times, and complete Build America, Buy America (BABA) self-certification documentation with every order.

How much slack can a telecommunication pole store?

This all-metal pole-mount enclosure stores up to ~250 (144-count) of outdoor fiber slack. Powder-coated steel and stainless hardware ensure field durability, while cable keepers and key-hole mount points ensure organized, secure slack storage on telecommunication poles.

Westell offers secure, weather-tight outdoor network enclosures to protect electronic equipment for outdoor telecom networks.

Our cabinets are built to withstand harsh weather conditions and provide excellent protection for power management systems, telecom base stations, energy storage battery systems, and radio equipment.

Whether you're planning a single installation or a large-scale network deployment, we deliver BABA-compliant outdoor telecom enclosures built to perform and engineered to last.

These cabinets are constructed using high-quality materials and fortified with secure locking mechanisms,
