Custom-designed energy storage solutions for commercial and industrial businesses: Our systems are optimized for peak shaving, demand charge reduction, energy arbitrage, and backup power, ...

The 120 kW automatic switching cabinet integrates STS-based control, protection, and monitoring functions to enable safe and automatic grid-connected and off-grid operation works with energy ...

Innovate the modular battery swap mode of "vehicle and electricity separation". Relying on intelligent battery compartment, Internet of Things real-time monitoring system and cloud energy dispatching ...

A BESS cabinet is an industrial enclosure that integrates battery energy storage and safety systems, and in many cases includes power conversion and control systems.

Off grid standby power supply: when the power supply of the power grid is interrupted, provide uninterrupted short-term power supply for important loads to reduce the economic losses caused by ...

By partnering with experienced PVMARS Solar, you can be confident that your installation project will be successful. This will meet your renewable energy needs for 25 years and more.

20-120kWh modular battery storage system for commercial, solar, and backup applications. Scalable, high-voltage solution with LiFePO4 safety and BMS.

Featuring 215kWh of LiFePO4 storage and a 120kW PCS, this system is engineered for industrial parks and commercial complexes that require high-power energy management.

These cabinets are designed to store and manage lithium-ion batteries used in electric vehicles, allowing for quick and efficient battery swapping as an alternative to traditional charging methods.

120kW Energy Storage Cabinet for Battery Swapping Station

This system provides a 120kW sustained power output and a battery capacity of up to 225kWh, easily meeting the demands of most high-load applications like factories, commercial buildings, or large ...
