E-AGM Series Batteries E-AGM-2000 (2V2000AH) Specifications

Lithium battery sizes refer to the standardized physical measurements of rechargeable cells, usually coded as five-digit numbers like 18650 or 21700. In these codes, the first two digits ...

The "2000ah" refers to the battery's ampere-hour (Ah) rating, which is a unit of measure for the battery's capacity. In simple terms, a 2000ah lithium battery can provide a continuous current ...

GFM-H series batteries use AGM technology with single large capacity and thick plate structure design. It has longer floating life and high floating consistency. Its modular and horizontal structure design ...

Advanced design works right out of the box and requires zero maintenance, zero adding of fluids compared to a flooded wet cell battery. Rechargeable spill proof battery has a characteristic of high discharge rate, ...

Egber 2v 2000ah battery is manufactured with special separators and silica gel immobilizing the electrolyte inside the battery. The proven silica gel technology can improve battery cycle life and ...

The MSB-2000 (2V 2000Ah) valve-regulated sealed lead-acid battery is specifically developed for high-load scenarios, featuring impact-resistant ABS casing and gel electrolyte technology to achieve an ...

This document provides specifications for the GFM-2000 series VRLA battery. Some key details include: - Nominal voltage of 2V, capacity of 2000Ah, and weight of 112.5kg.

GFM-2000/2V2000Ah is one popular model in 2V industrial battery. It is suitable to make a 12V, 24V, 48V battery bank. With patented AGM material and advanced thick plates, GFM-2000 is stable ...

These superior VRLA batteries feature excellent deep discharge recovery and fast recharge performance. These features make REX series more cost effective than the nearest equivalent. The ...
