The project, located in Cotorro--on the outskirts of Havana--is part of the island's government's bet on solar energy to address the country's dire electricity situation.

The Energy Minister also discussed plans to enhance thermal and distributed generation, both plagued by frequent blackouts on the island. The Felton 2 thermal unit, one of the most critical ...

That's Cuba today. With aging infrastructure and reliance on imported fossil fuels, the country is turning to solar photovoltaic power plant systems as a golden opportunity.

We have deployed Solar Power Container units at three of our mines and the results have been outstanding. The ease of transportation and short installation time saved us weeks of downtime.

Despite the scale of the program, only four parks are currently planned to include energy storage systems: two in Havana, one in Holguín, and one in Granma. Each of those battery banks ...

A horse-drawn carriage passes a photovoltaic park in Yaguaramas, Cienfuegos Province, Cuba, where hundreds of workers are hastily installing 44,000 solar panels.

The Huijue Group Off-Grid Solution comprises three main components: photovoltaic systems, energy storage ...

The objective is clear: develop one thousand MW of solar power by constructing around fifty photovoltaic parks throughout Cuba. Nevertheless, this initiative stands on precarious ground ...

The Cuban government announced that before the end of 2025, there will be 51 photovoltaic parks operating in the country, of which 32 are already synchronized with the National ...

25kW Smart Photovoltaic Energy Storage Unit Used on Cuban Farms

According to information provided by the Cuban newspaper Granma, only four of the projects that will be operational this year have a 50-MW battery storage system.

As part of that strategy, the use of photovoltaic solar energy has been promoted in Cuba, for which - since the beginning of 2024 - a broad investment process consisting of two projects is ...
