The Atess Bypass Cabinet, 400V, 500kW, is purpose-built for energy storage and power distribution systems, delivering resilience and operational stability in high-demand, mission-critical applications.

In addition to enclosure manufacturing, KDST provides complete system integration, including installation of electrical modules, cable routing, component mounting, and functional ...

Our solution is an all-in-one package: Battery packs, charge controller, BMS, EMS, and PcS, all integrated into a single unit with a highly efficient three-level topology to optimize system efficiency.

Designed for versatility and space efficiency, the cabinet is modular, allowing for easy integration into existing energy systems or new setups without requiring extensive space.

The BYHV-ACB0501 AC parallel cabinet enables safe and reliable parallel operation of energy storage systems through integrated switching, control, and protection supports flexible power distribution, ...

The Vertiv™ NetSure™ HVT solution includes all of the components required for your 400V HVDC power site including a rectifier cabinet, DC distribution cabinet, optional AC distribution cabinet, PDU ...

BESS Cabinet (Battery Energy Storage System Cabinet): The Most Detailed C& I Guide for 2026 A BESS cabinet (Battery Energy Storage System cabinet) is no longer just a "battery box." In modern ...

Product Advantages Non-Walk-In design with less footprint Easy installation and O& M Support installation against wall Maximum 6 Energy Storage Cabinets in Parallel

The 418kWh BESS Cabinet is a high-capacity all-in-one (AIO) energy storage cabinet built for commercial and industrial (C& I) users who need fast deployment, scalable expansion, and clean ...

400V Power Storage Cabinet System Integration

To address this, data centers are exploring the integration of both high-efficiency AC and 400V DC rack power distribution by leveraging mSiC(TM) technology to optimize power conversion, ...
