It will be one of the largest power plants of its kind in Central Africa. The facility will supply clean, reliable energy to the Kamo-Kakula Mining Complex under a 17-year power purchase ...

Africa's solar energy market continues to grow significantly. In 2025, the continent added more than 5,000 MW solar power capacity. In this article, we breakdown countries leading this drive.

Installations of solar power in Africa jumped 54% in 2025, new data shows, marking the fastest annual growth on record, driven by governments and development agencies deploying utility ...

Located in the Aswan Governorate, this flagship project underscores AMEA Power's commitment to accelerating the global transition to clean energy and is one of the largest solar PV ...

Solar installations rose 54% in 2025, reaching about 4.5 GW South Africa, Nigeria, Egypt, and Algeria led new capacity additions Africa could exceed 31.5 GW of installed solar capacity by ...

In 2025, the top 10 solar markets accounted for around 90% of new solar capacity additions, led by South Africa (1.6 GW), Nigeria (803 MW), Egypt (500 MW), and Algeria (400 MW), reflecting ...

Africa saw record growth of 54% in its solar installations in 2025, with 4.5 GW of new capacity deployed, marking a turning point in the continent's energy transition.

In 2025, the top 10 solar markets accounted for around 90% of new solar capacity additions, led by South Africa (1.6 GW), Nigeria (803 MW), Egypt (500 MW) and Algeria (400 MW), ...

Africa recorded its highest-ever solar capacity additions in 2025, with a 54% year-on-year increase, led by South Africa and Nigeria. South Africa added 1.6 GW, Nigeria 803 MW and Egypt ...

East Africa's solar surge is backed by impressive stats: The region added 300 MW of solar in 2024 alone, with

500 MW of solar power in East Africa

projections for 500 MW in 2025, according to the Global Solar Council.
