As a major hub for strategic partnerships, the event provides insights into the current strategy for wind, energy storage use in ASEAN, including offshore wind projects and investment opportunities.

Contractual reforms and targeted measures to accelerate investments in renewables are key to unlocking ASEAN's potential for a clean energy future. This piece explores strategies to ...

From January to May 2025, Southeast Asia has witnessed a surge in clean energy developments, with large-scale solar, wind, and battery storage projects gaining momentum across the region.

Summary: ASEAN energy storage battery projects are rapidly expanding to meet growing renewable energy demands. This article explores major initiatives, industry trends, and data-backed insights ...

This paper explores the role of BESS in the ASEAN energy landscape, examining current trends, benefits, challenges, and the pathway towards optimising its potential across the region.

Modern, flexible grids are essential to unlock ASEAN's solar and wind potential, create new jobs and new market opportunities. Rising solar and wind generation, as well energy demand ...

A new wind battery storage project is slated to further power Cambodia's clean energy journey, with Minister of Mines and Energy Keo Rottanak unveiling the energy project in Kampong Chhnang, ...

Utility-scale solar and wind capacity in the Association of Southeast Asian Nations (ASEAN) is up by a fifth since this time last year, and the region is on track to easily meet its ...

Our findings provide policymakers a second opinion on how to scale up solar and wind with battery storage to contribute to future significant ASEAN decarbonization.

ASEAN Wind Solar and Energy Storage Project

The grid routes for interconnections are home to as much as 30 GW of solar and wind potential, creating new jobs, boosting economic growth and opening major market opportunities, ...
