Sept 8 (Reuters) - The U.S. solar industry is at risk of installing 27% less capacity between 2026 and 2030 than before the passage of President Donald Trump's tax law that rolled back subsidies...

This month's "Solar Policy Spotlight" delves into these pivotal changes, highlighting new legislation, incentive programs, and regulatory adjustments designed to promote solar energy.

These developments in solar industry conditions and policies have affected U.S. manufacturing capacity, solar PV installations, component imports, and workforce needs. Solar PV manufacturing has five ...

The continued growth of the distributed solar market has prompted electric utilities, regulators, and others to consider improvements to the interconnection processes. Below are ...

Explore the latest U.S. solar policy changes in Sept 2025, from ITC rules to tariffs and state programs. See how they impact solar developers and markets.

In 2025, a growing number of jurisdictions mandate or incentivize the inclusion of solar photovoltaic (PV) systems in new construction. These government policies for solar panel integration ...

At the federal level, there are several key policies, programs, and regulations that impact the development of solar PV and other renewable energy projects, influencing project procurement ...

SEIA is engaged with policymakers at the regulatory and legislative levels in Washington, D.C. and across the country to establish supportive policy frameworks that allow solar to compete in the ...

Stay updated on the latest U.S. solar policy changes, including new tariffs, clean energy tax credits, and EPA rollbacks. Learn how these shifts impact the solar industry in April 2025.

About the latest national policy on photovoltaic panels

Photovoltaic (PV) technologies - more commonly known as solar panels - generate power using devices that absorb energy from sunlight and convert it into electrical energy through semiconducting ...

State Solar Carve-Out ProgramsSolar Interconnection Standards & PoliciesUnderstanding Electricity Market Frameworks & PoliciesInterconnection standards define how a distributed generation system, such as solar photovoltaics (PVs), can connect to the grid. In some areas of the United States, the interconnection process lacks consistent parameters and procedures for connecting to the grid or is unnecessarily complex. This drives up costs and causes delays, which can be sign...See more on epa.govCongress.govSolar Photovoltaics (PV): Status and Issues for CongressThese developments in solar industry conditions and policies have affected U.S. manufacturing capacity, solar PV installations, component imports, and ...
