As well as being a fossil gas plant, the project is controversial due to being sited on agricultural land. Local people allege that most of the electricity will be exported to Greece. Albania is likely the only ...

OST sh.a. was established on July 14, 2004, as a result of the reform and division of the Albanian Electricity Corporation, from a company organized vertically with functions of generation, ...

Construction of new generation sources and transmission lines, improvements to the grid, and investment in renewable energy all represent promising investment opportunities in Albania.

The public energy supplier is obliged to pay a regulated tariff for the electricity generated from renewable energy sources. Small producers are also entitled to benefit from a net-metering scheme.

Small-scale renewable assets in Albania are eligible for feed-in-tariffs guaranteed through the obligatory purchase of energy by the distribution system operator (DSO).

Key findings The analysis highlights several structural characteristics that frame Albania's e-mobility transition. First, Albania benefits from a renewable-dominated electricity system based primarily on ...

Spanning 200 hectares, the power station is projected to yield 265 GWh annually and effectively offset over 29,165 tonnes of CO₂ per year, perfectly aligning with Albania's ambitious goal of achieving ...
