Why are American made solar inverters so popular?

American made solar inverters are renowned worldwide for their quality, durability, and technological advancement. The country's strong focus on research and development, along with a supportive policy environment, has allowed these manufacturers to create products that are not only competitive but often set industry standards.

Who makes the best solar inverter?

Known for their durable and reliable inverters made in the USA, OutBack Power is a premier choice for off-grid and battery-based solar systems. The company is based in Arlington, Washington and has been delivering advanced power solutions since 2001.

How long does a solar inverter last?

A solar inverter typically lasts around ten years on average. As such, the warranty being offered with any standard inverter should cover at least those ten years. One that comes with an even longer warranty period is even better. After all, it indicates the manufacturer's confidence in the quality and life expectancy of the product.

What are the best residential string solar inverters?

The Fronius Primo' SnapINverters' have quickly gained a reputation as top-notch and extremely dependable residential string solar inverters. That is hardly a surprise, considering how easy it is to install, service, monitor, and even set up this inverter!
