Australians love rooftop solar power. About 4 million homes have solar panels on their roofs, and we generate more solar energy per person than any other country. But affordability ...

2023 saw rooftop photovoltaic ("PV") installations surpassed a total of 20 GW installed capacity in Australia. With 970 MW of new rooftop solar systems installed in 2023, New South Wales ...

A Clean Energy Council report revealed that rooftop solar panels and backup batteries are experiencing significant growth among homeowners and businesses in Australia. As pv magazine ...

With Australians installing about 300,000 rooftop systems a year, 1 in 3 Aussie homes now have rooftop solar. Solar uptake has been driven by the Small-scale Renewable Energy ...

Over 4.2 Million homes and businesses in Australia have installed solar panels and are reaping the savings benefits of solar while also reducing their carbon emissions.

Australian households and small businesses continue to spearhead the nation's renewable energy transition with a new report revealing that 1.3 GW of rooftop solar capacity was ...

Slightly more than half of owner-occupied houses in Australia have solar panels. Our new research looked at the factors that influenced household solar panel uptake in the Sydney...

IN AUSTRALIA The penetration of Australian rooftop photovoltaics (PV) in the energy market continues to grow and contributed roughly 15 per cent (approximately 8,172 GWh) of the National Electricity ...

As of June last year, approximately 15.1GW of residential solar was installed in Australia. The report found there was approximately 45.8GW of unrealised potential solar energy for houses ...

Australians install photovoltaic panels on their roofs

See Australia's 2026 rooftop solar statistics, including national capacity, state-by-state installations, system sizes, battery attachment, exports and penetration rates. Updated with Clean ...
