Battery energy storage systems (BESS) have emerged as a solution for mitigating the intermittent nature of solar and wind power with the rise of renewable energy. ...

The Energy Ministry aims to generate 720 billion baht in investment for energy development projects, notably solar power and carbon capture storage, putting Thailand on a fast ...

With ongoing deployment of variable renewable energy technologies, such as solar and wind power, the opportunities for energy storage projects will increase. Long-term plans to liberalise ...

The city's new hybrid energy storage project bidding initiative combines solar power, battery storage, and smart grid technologies - a blueprint for urban energy transformation. Let's explore what this ...

The project aligns with the city's BMA Net Zero policy and the Bangkok Master Plan 2021-2030, which aim to achieve carbon neutrality and sustainable energy use.

With the ASEAN Smart Energy & Energy Storage Expo 2026 set to take place in March 2026 in Bangkok, Thailand, this flagship event will focus on solar PV, energy storage, batteries, ...

EGAT undertook some studies on the potential for energy storage and is piloting three battery energy storage installations. One is located alongside a solar project in Mae Hong Son Province to improve ...

The government's Alternative Energy Development Plan (AEDP) promotes energy diversification, including storage systems and emerging technologies like green hydrogen.

Bangkok's streets buzzing with electric tuk-tuks charged by solar farms, while resorts in Phuket keep their aircons running smoothly using battery systems. This isn't science fiction - it's the ...
