SOLUTION MODEL 17000 SERIES The 17000 Series is a battery cell formation turnkey solution provided by Chroma for planning and servicing cell production formation and test from barcode .

It includes the design of battery test equipment, cell conveyor, and production management system with multiple customized functions and features to increase efficiency and improve yields. The charging ...

Discover automated battery manufacturing and testing solutions for modules and packs, ensuring efficiency, scalability, and high-quality production.

Repower provides battery testing equipment, formation/grading systems, and automated PACK production lines. High-voltage battery solutions for global clients since 2003.

We can customize the design of battery production line according to different customer requirements, and flexibly adapt to various battery specifications and module structures.

From modules to battery packs, this test system enables comprehensive battery testing in production. The system supports both Conformity of Product (CoP) and Quality Assurance (QA) testing.

What is a Battery Assembly Line? A battery assembly line is a system that puts together different parts of a battery, like cells, tabs and modules, into a complete unit. It uses machines, robots and ...

Explore the BPT Platform and how it enhances production testing for electric vehicles, increasing flexibility and efficiency.

Immerse yourself into the realm of pack assembly and end-of-line (EOL) testing with our animation, crafted to showcase the custom solutions offered by Bosch Rexroth for battery manufacturing.

Battery cabinet dynamic test production line

The BMS and the battery pack end of line test system can be widely used in battery pack production lines, providing a programmable software platform and customized test items to efficiently verify ...
