What is a battery-electric vehicle (BEV)?

What Is a BEV? A battery-electric vehicle is simply an electric vehicle powered solely by batteries. It relies on the charge stored in a large battery pack to drive one or more electric motors. These motors are much smaller and easier to position than an internal combustion engine, providing key advantages that we'll get into in a moment.

Does a BEV need a battery?

However, battery replacement can be a significant cost later in the vehicle's life. What are the safety features of BEVs? BEVs often include advanced safety features such as automatic emergency braking, lane departure warning, adaptive cruise control, and numerous airbags, comparable to or exceeding those found in ICE vehicles.

What are the safety features of a battery electric vehicle (BEV)?
