The BYD Blade Battery is a lithium iron phosphate (LiFePO₄) energy storage system designed for residential use. With capacities like 48V 200Ah and 138Ah, it offers high energy density, ...

The residential battery marks the fourth generation of its home storage systems first introduced in 2015. The system incorporates BYD's Blade Battery technology, previously used in its ...

Can I use automotive BYD blade batteries for home energy storage? No--automotive variants operate at incompatible voltages (500V+ vs. 48-200V for homes) and lack necessary safety ...

Blade battery technology addresses the core challenges of home energy storage: safety, affordability, and adaptability. By lowering production costs and offering a modular, stackable design, ...

The BYD Blade Battery is revolutionizing the energy storage industry with its cutting-edge technology, superior safety, and long lifespan. Whether for residential, commercial, or industrial ...

At the Smart E trade fair held from May 7-9, 2025, in Munich, Germany, BYD Energy Storage unveiled its latest residential battery system, the Battery-Box HVB, also known as the high ...

From single family home to commercial applications, if you can design it, you can use the Battery-Box to build it. As an installer you want to work with the same common building block but adapt it to the ...

While currently focused on electric vehicles, BYD has announced plans to expand into home energy storage systems. This could benefit recovery residences seeking sustainable power ...

Earlier this week at the Smarter E Europe trade exhibition, BYD Energy Storage debuted its fourth-generation residential battery, the Battery-Box HVB. Combining proven EV blade-cell chemistry...

Blade Battery Home Energy Storage System

BYD launches its next-gen Battery-Box HVB for residential energy storage, featuring Blade Battery technology for the first time outside EVs. Now more efficient, modular, and compact.
