The Energy and Environment Sector in Bosnia and Herzegovina plays a crucial role in building resilience by strengthening environmental governance, promoting renewable energy, and enhancing disaster ...

Bosnia and Herzegovina stands at a pivotal juncture: renewable energy deployment, especially solar, is accelerating rapidly, and market rules have been developed to accommodate ...

This project aims to implement a battery energy storage system (BESS) for EPBIH, aimed at enhancing the decarbonisation of the energy sector in Bosnia and Herzegovina.

With the adoption of the NECP, Bosnia and Herzegovina should seek to improve the country's long-term resilience, advance its economic diversification and competitiveness, and to secure its energy supply ...

“The forthcoming National Climate and Energy Plan will put Bosnia and Herzegovina on the right path to ensure the energy security while improving its long-term resilience to climate change.

Market and policy reforms that incentivize flexibility and demand response. Without these structural improvements, the growing penetration of iRES could lead to inefficiencies, more frequent ...

Bosnia and Herzegovina is set to have its first battery energy storage systems (BESS), Mirza Kusljagic, a member of the Board of the Regional Center for Sustainable Energy Transition...

The country is preparing to install its first battery energy storage system - with a capacity of up to 120 MWh. This is a huge step towards energy system stability, better use of renewables and ...

For Banja Luka and surrounding regions, energy storage isn't just about technology - it's about securing reliable power, enabling clean energy growth, and building climate resilience.

Bosnia and herzegovina energy storage for resilience

Energy production in Bosnia and Herzegovina is carried out using primary energy from solid fuels, wood biomass, hydropower, as well as other forms of RES (solar and wind energy).
