The objective of this report is to provide a comprehensive summary of the key findings and recommendations discussed and provide a valuable framework for APEC economies to accelerate ...

Two large, grid-supporting energy storage facilities have been approved in Scotland.

It will store 300MW of energy, enough to power 68,000 homes for two hours, and can ramp up to full power in seconds. Like the coal plants before it, the battery will serve London, helping ...

SSE Renewables has announced plans to develop a 150MW battery storage facility on the site of a former coal-fired power plant in West Yorkshire in the north of the UK.

A UK coal power station is being converted into a giant energy storage facility. Transforming a UK coal plant into a large battery aims to improve energy efficiency.

Pulse Clean Energy has announced the commissioning of its 30MW / 67MWh battery energy storage system (BESS) at Coal Pit, a site once used for coal mining but now transformed into ...

Energy companies are turning defunct fossil fuel sites, like Ferrybridge C in West Yorkshire, into battery energy storage systems (BESS) to store excess renewable energy for future use.

On 30 September 2024, the UK's last power station making electricity from coal - Ratcliffe-on-Soar in Nottinghamshire - closed, ending a century and a half of coal playing a central role in powering the ...

SSE Renewables has taken steps to progress the battery energy storage system project planned at the former Ferrybridge coal-fired power station in West Yorkshire.

With the closure of the last coal-fired power station in the UK, it raises questions about how old fossil fuel
