Can you put vinegar in kitchen cabinets?

Keep vinegar in kitchen cabinets away from any peroxide products. If you use both for cleaning, never apply one immediately after the other on the same surface. Consider labeling these items with warning stickers if you have household members who might not be aware of the dangers.

How do you store cleaning products?

Create separate storage zones for acid-based and alkaline cleaning products. Store toilet bowl cleaners and vinegar-based products in one designated area, preferably in a chemical-resistant storage bin, and keep drain cleaners and oven cleaners in a completely different location.

How do you store a toilet bowl cleaner?

Store toilet bowl cleaners and vinegar-based products in one designated area, preferably in a chemical-resistant storage bin, and keep drain cleaners and oven cleaners in a completely different location. Always check product labels to identify whether a cleaner is acidic or basic.

Should you use a locking medicine cabinet for rubbing alcohol?

Consider using a locking medicine cabinet for rubbing alcohol if you have children in the home, which adds an extra layer of protection against improper mixing. When disposing of either product, never pour them into the same container or drain, as this can also trigger the dangerous chemical reaction.

[Send your health]: This is a high-temperature disinfection cabinet, which can help you remove odor, effectively disinfect, dry moisture, and prevent secondary pollution of tableware.

As appliance guru Lisa Yang puts it: "Using a disinfection cabinet for storage is like keeping racehorses in a garage - possible, but missing the point entirely."
