What are the different types of electric car chargers?

Electric car chargers vary in how fast they charge and how much of an investment you might need to make. Different types of electric car chargers may also require different connectors or other equipment. The most common residential choices are Level 1 and Level 2.

Do you need a home charger for an electric car?

If you're thinking about purchasing an electric vehicle (EV), you'll probably also want to get a home charger installed. That way, you'll be able to conveniently recharge the battery while your car is parked at home.

Should I buy a portable electric car charger?

If you have an electric vehicle, it's worth investing in a portable electric car charger, or spare EV charger, so you have backup charging options. Use a level 1 charger in a normal 120-volt household outlet or charge your car faster with a level 2 charger in a special 240-volt outlet. Level 2 charging takes about half the time of level 1 charging.

What EV chargers are available?
