Europe is getting a new battery manufacturer: GAZ Energy. In the eastern Czech city of Bohumín, near the Polish border, a new production facility for battery storage solutions is being...

With the growing share of renewable energy and the rapidly decreasing costs of battery storage technologies, the Czech Republic is experiencing a new energy boom.

This article explores the applications, market trends, and competitive advantages of Czech-made storage systems, with actionable insights for businesses seeking reliable energy management.

Think of this new technology like a vast, rechargeable reservoir for electricity; it captures energy when abundant and releases it steadily as needed, unlike a small pond that quickly empties.

Transitioning entirely to renewable energy and storage technologies like flow batteries is not yet feasible. The infrastructure required for such a shift is enormous, and the costs - both ...

China's AlphaESS has signed a cooperation agreement with EPC partner Eltodo a.s. to deliver a combined 320 MWh of utility-scale battery energy storage systems (BESS) across two sites ...

The implementation of the 2026 regulatory new policy for battery energy storage in the Czech Republic marks an important milestone in the development of the energy storage industry in ...

Unlike lithium-ion systems, these batteries store energy in liquid electrolytes, allowing unmatched scalability for grid applications. Europe and America have seen 42% annual growth in flow battery ...

A country known for medieval castles and world-class beer is now making headlines as Europe's rising star in electric energy storage. With EUR279 million EU funding pouring into its grid ...

A new battery manufacturer, GAZ Energy, has been established in Bohumín, a city in eastern Czech

Czech liquid flow energy storage battery

Republic near the Polish border. The facility, launched in 2025, focuses on producing ...
