---

Rack-based form factor with no side access required so units can be installed tightly side-by-side. Ideal for retrofit data centers that need to maximize white space while providing high-capacity direct-to ...

From megawatt to gigawatt, from 10 kW to 100 kW racks, the data center industry is scaling at speeds once unimaginable. Every decision -- in design, power, cooling, and people -- must now serve an ...

The "sovereign AI cloud data center" to be built in Yeouido will have a capacity of 5 megawatts (MW) and will be designed to connect large-scale AI workloads based on graphics ...

According to the filing, Oppidan plans to develop a 5MW, 61,500 sq ft (5,715 sqm) facility at 2325 Eberhardt Road in Temple, Bell County. The $31 million project is set to run from July 2025 ...

The Facility Distribution Unit (FDU) is a 5-megawatt liquid cooling system, engineered to serve entire data halls. It is now operational in AI data centers WARSAW, MASOVIAN, POLAND, ...

The exponential growth of AI workloads is increasing data center power demands. Traditional 54 V in-rack power distribution, designed for kilowatt (KW)-scale racks, isn"t designed to ...

Boyd"s ROL2300 is a high-capacity data center cooling system designed to deliver efficient thermal management by leveraging facility water in an in-row cooling configuration. Boyd"s ROL2300 has a ...

Ground up construction of a 61,554sf 5MW data center on a green field site in El Paso.

This comprehensive guide examines future-proofing strategies for data centers, covering ultra-high density power and cooling, quantum integration, emerging compute paradigms, and infrastructure ...
