Presidential Policy Directive 21 (PPD-21): Critical Infrastructure Security and Resilience advances a national policy to strengthen and maintain secure, functioning, and resilient critical infrastructure. This ...

Since the end of the Cold War, the station has mainly been employed to intercept and record weapons and communications signals from countries in Asia, such as China and North Korea.

This upward trend in the market for green base stations for mobile communication is the result of rising energy costs, government policy initiatives and concern for environment.

OverviewOperational historyBaseWhitlam dismissalAllegations of Christopher BoyceProtestsIn popular cultureCitationsIn late 1966, during the Cold War, a joint US-Australian treaty called for the creation of a US satellite surveillance base in Australia, to be titled the "Joint Defence Space Research Facility". The purpose of the facility was initially referred to in public as "space research". It was officially referred to as a "joint space research facility" until 1988. The Pine Gap treaty was signed on 9 December 1966 and stated that, after an initial nine years, either Australia or the US could cancel the agreement on giving one year's n...

Several techniques have been deployed to reduce the energy consumption of the base station in what is called a green base station. This paper presents an insight into these approaches and highlights key ...

Djibouti Telecom has started construction of a New Cable Landing Station (CLS) in Djibouti City. It is designed as a neutral digital port to provide an open access cable landing ...

Ericsson made a point of its green credentials at the recent Mobile World Congress, and launched a "green" base station design back in 2007. Its commitment extends from materials used in base ...

The Federal Communications Commission (FCC) regulates interstate and international communications by

Does green communication base station belong to the government

radio, television, wire, satellite, and cable in all 50 states, the District of Columbia and U.S. territories.

The U.S. Army Communications-Electronics Command (CECOM) sustains and delivers command, control, communications, computers, cyber, intelligence, surveillance, and reconnaissance (C5ISR) ...

Green network aims to promote the sustainable development of communication systems, and base station (BS) and cells sleeping has been proven effective in reducing the ...

In order to effectively improve the energy efficiency of the future mobile networks, it is thus important to focus the attention on the Base Station.
