Just be sure to put them to sleep before powering them off. It's probably not useful, but at least if they have a "shut down process"; it's done when entering sleep. At this moment, only the quick wake up ...

Yup, likely this bios setting. You'll definitely want the gamedac off when not in use because that oled screen burns in pretty badly.

You don't need to unplug them, just use the steamvr base station settings to let steamvr turn off the base stations. It will also turn them on when launching ...

Is unplugging them from the wall or pulling the power cable out of the unit the only way to do that? It's a machine with moving parts, so yes, you definitely want to power them down when not ...

You don't need to unplug them, just use the steamvr base station settings to let steamvr turn off the base stations. It will also turn them on when launching steamvr.

Learn how to easily disable HTC Vive base stations and conserve power when not in use. Follow these simple steps to turn off your stations and extend their lifespan.

SteamVR's Base Station Power Management feature is turned OFF by default. Turning this feature ON ensures that your Base Stations power off when not in use to reduce power usage and extend their ...

Firstly, keeping base stations constantly powered ensures uninterrupted connectivity, allowing users to enjoy continuous network access without any disruptions. This is particularly crucial ...

By leaving base stations plugged in, you're essentially putting your device's battery through unnecessary stress, which can reduce its overall lifespan. Some people believe that leaving ...

Does the base station need to be powered off

It's very likely that the vast majority of base stations will be effectively obsolete and replaced before their motors fail from normal usage. Enable power management in steamvr settings and they'll go on ilde ...

As far as I know they're powered by hard-drive motors... so they should in theory be able to run continuously for years on end. I always turn mine off though, with remote power plugs, they do ...
