What is a 5G Action Plan for Europe?

The Commission adopted a 5G action plan for Europe in 2016 to ensure the early deployment of 5G infrastructure across Europe. The objective of the action plan was to start launching 5G services in all EU Member States by end 2020 at the latest.

Why should 5G networks be harmonised across Europe?

The deployment of 5G networks depends closely upon access to radio spectrum, the basis of wireless technologies. As the rate of connected devices and their use increases, spectrum resources and their uses have to be harmonised across Europe to allow for interoperability of infrastructure across borders.

When will 5G be available in Europe?

The objective of the action plan was to start launching 5G services in all EU Member States by end 2020 at the latest. Following this, it suggests a rapid build-up to ensure uninterrupted 5G coverage in urban areas and along main transport paths by 2025.

How does the European Commission support 5G?

The European Commission identified 5G opportunities early, establishing a public-private partnership on 5G (5G-PPP) in 2013 to accelerate research and innovation in 5G technology. The European Commission has committed public funding of more than EUR700 million through the Horizon 2020 Programme to support this activity.

The objective of the action plan was to start launching 5G services in all EU Member States by end 2020 at the latest. Following this, it suggests a rapid build-up to ensure uninterrupted 5G coverage in ...

The Europe 5G base station market was valued at US\$ 5,854.74 million in 2022 and is expected to reach US\$ 18,890.44 million by 2030; it is estimated to register a CAGR of 15.8% from 2022 to 2030.

ETSI TC MSG/TFES is developing harmonised standards for 5G base stations (including repeaters) and user equipment, updating the EN 301 908 series to include 5G support.

The Funding and Tenders Portal is the single entry point (the Single Electronic Data Interchange Area) for

EU bidding for 5G communication base stations

applicants, contractors and experts in funding programmes and procurements managed by the ...

The European 5G Observatory tracks progress in 5G infrastructure deployment across the EU and other regions worldwide according to base stations deployment, edge nodes and infrastructure sharing ...

The European Investment Bank (EIB) has signed a EUR315 million finance contract with Cellnex to support the development of the mobile telecoms infrastructure behind 5G rollouts in Spain, ...

The 5G PPP will deliver solutions, architectures, technologies and standards for the ubiquitous next generation communication infrastructures of the coming decade.

The Europe 5G Base Station Body market is undergoing rapid transformation, driven by technological advancements, regulatory shifts, and evolving consumer demands.

The Europe AFU (Antenna Feeder Unit) of 5G Base Station market is witnessing accelerated growth driven by surging investments in 5G rollout, especially across Germany, France, ...

This continent databook contains high-level insights into Europe 5g base station market from 2018 to 2030, including revenue numbers, major trends, and company profiles.
