How do you charge an electric car?

Before looking at how you charge an electric vehicle, it's first important to understand where you can charge it. Unlike gas cars, EVs can technically be charged pretty much anywhere with a power outlet.

How long does it take to charge an electric vehicle?

Provides approximately 25 miles of range per hour of charging. Requires 20-30 minutes for 80% charge and 1 hour for a full charge. Uses a public charging station. May affect battery performance and life with frequent use. Provides approximately 100-200+miles of range after 30 minutes of charging. How Safe Is Charging an Electric Vehicle?

How hard is it to charge an electric car?

Charging an electric car may seem complex, but with the exception of the additional time it takes to get your car to its full energy capacity, it's generally no harder than fueling up a gas- or diesel-powered vehicle. Even better, those with an at-home charger will find charging their electric car is just as easy as charging any mobile device.

How do I charge my EV?

Get the charging cable. Whereas home chargers often have a built-in cable, it's more common for public charging stations to require you to bring your own. Usually, your EV's manufacturer will provide a suitable public charging cable for your region, so it's worth always keeping it in your car's trunk. Connect the car to the charger.
