What is the global electric vehicle market report?

The report draws on our team of specialists around the world and covers all major vehicle markets. It includes analysis on vehicle sales, oil markets, electricity demand, charging infrastructure, batteries, metals and CO2 emissions. Global sales of electric vehicles continue to rise and are set to represent one in four cars sold this year.

Will China's EV market be electric?

Globally, China's EV sales are by far the largest. Sales and customer data suggest that the future of China's market will be electric, with more than 80 percent of Chinese respondents stating that their next car will likely be electric. This demand suggests that the market has transitioned from "regulatory push" to "consumer pull."

What is the global transition to EVs?

The global transition to EVs varies considerably across the world's major regions. Some markets, such as China, are clearly moving to an electrified future, but the EV transition is proceeding more uncertainly in other markets.
