Is the Bahamas ready for a new energy era?

“The Government of The Bahamas is committed to a new energy era where modernized infrastructure, clean energy, and major reforms drive down costs and enhance reliability for all Bahamians. This transformation won't happen overnight, but its impact will be game-changing.”

How will technology transform the Bahamas' energy system?

Advanced technologies are being integrated into the nation's energy framework to create a more resilient grid, tailored to meet the unique needs of New Providence and the Family Islands. This transformation will incorporate a variety of sustainable energy sources, including: Microgrids will play a key role in The Bahamas' energy transformation.

How will a new energy plant benefit the Bahamas?

Once connected to the Bahamas' national grid, the plant will enhance energy stability and benefit more than 200,000 residents, as well as the 5 million tourists who visit Nassau each year. The system is designed to manage grid fluctuations, while boosting efficiency, delivering a more reliable and affordable energy supply.

Does New Providence have solar power?

Solar power in New Providence is set to make a significant leap forward with the integration of Utility-Scale Solar. Under the New Energy ERA 70MW of solar power will be added and 35MW of Battery Energy Storage Systems (BESS) to the existing grid, enhancing energy reliability and reducing dependency on traditional fuel sources.

Nikkiso will supply LNG regasification systems and engineering services for a Shell-backed power project in Nassau, Bahamas, replacing diesel with natural gas to support lower-carbon ...

The Energy Minister was speaking at the signing of Power Purchase Agreements (PPAs) with two Bahamian partners, who will help to transform ...

The modernization of the electricity grid and transmission and distribution network for New Providence, through a partnership between BPL and Island Grid is the third reform in the ...

Bahamas Power and Light Company provides reliable energy solutions, grid maintenance, and
