What is the price of electricity in Sudan?

Sudan, September 2022: The price of electricity is 0.009 U.S. Dollar per kWh for households and 0.045 U.S. Dollar for businesses which includes all components of the electricity bill such as the cost of power, distribution and taxes.

Why does South Sudan have a low electricity rate?

South Sudan has one of the lowest electrification rates in the world; only 8% of its population had access to electricity in 2021, according to the latest estimates from the World Bank. Those connected to the power network experience frequent blackouts or forced load shedding, which makes standby generators necessary to meet electricity needs.¹⁸

How many people in Sudan have access to electricity in 2021?

Although power generation has continued to grow in the post-independence era, only about 62% of Sudan's population had access to electricity in 2021, according to the latest estimates from the World Bank. However, urban populations have substantially more access (84%) than rural populations (49%).

Does Sudan have wind and solar power?

Sudan has significant wind and solar energy resources that are largely untapped. According to a World Bank study, Sudan has significant wind power potential along its coast on the Red Sea and in the Northern State. Sudan also has solar power potential, but renewable power tends to be small in scale and used for off-grid solutions.¹⁶

These retail prices were collected in June 2025 and include the cost of power, distribution and transmission, and all taxes and fees. Compare Sudan with 150 other countries.
