According to the Q4 2025 US Energy Storage Monitor from Wood Mackenzie and ACP, 2025 energy storage installations surpassed 2024 capacity.

Looking ahead, experts predict 80 GW of new additions in 2025, representing an eightfold increase from 2021 levels. Perhaps most exciting is the emergence of long-duration storage ...

The push toward clean energy targets in 24 states also creates compelling opportunities for energy storage. While established markets like California, Texas and Arizona set the pace, the ...

The Department of Energy's (DOE) Energy Storage Strategy and Roadmap (SRM) represents a significantly expanded strategic revision on the original ESGC 2020 Roadmap.

These target future states were collaboratively developed as visions for the beneficial use of energy storage. The future states are further described below, including the gaps to address which may ...

Developers expect to bring more than 300 utility-scale battery storage projects on line in the United States by 2025, and around 50% of the planned capacity installations will be in Texas.

Our 2025 energy storage project plan targets these players with actionable insights. Think of it as your cheat sheet for the coming battery revolution.

Wood Mackenzie projects Q4 2025 will set a record for the residential sector as customers accelerate installations ahead of the Section 25D tax credit expiration. The Community, ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery

Energy Storage Project Planning for 2025

storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 ...
