A hybrid power plant with adjacent energy storage was commissioned in Osku, Veszprem county in western Hungary, which, unique to Central Europe, can store solar energy for six hours.

Energy Vault partners with EU Green Energy to deploy battery storage across the Balkans, boosting renewable integration and grid flexibility.

"It's like trying to pour new wine into old bottles," says energy consultant Goran Petrovski. "Our grid wasn't built for solar fluctuations or EV charging demands." Enter the modular energy storage ...

It's a chance to dive into the current state of solar and storage in the Balkans, understand the challenges and opportunities, and help shape the future of solar energy in the region.

Presented information about the prospects for pumped hydro storage installation in comparison to battery storage systems, especially for the Western Balkan region, is included in ...

This project, implemented in North Macedonia, is not only a technical achievement but also a milestone redefining the region's energy future. Our project integrates a 60 MW battery energy storage system ...

Quick Summary: Serbia is making waves in renewable energy integration through strategic energy storage battery installations. This article explores how these projects strengthen grid stability, support ...

Traditional power infrastructure simply can't keep up with the 23% surge in industrial energy demand since 2022. Well, here's the kicker - customized energy storage containers might just be the flexible ...

This article examines ATESS' pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, highlighting key projects across various factories and aligning them with ...

Energy storage container installation in the Balkan Peninsula

Let's face it - Skopje's energy landscape is changing faster than a Macedonian folk dance tempo. With increasing renewable energy adoption and grid stability challenges, container ...
