As a global leader in lithium-ion battery energy storage manufacturing, GSL ENERGY's liquid-cooled energy storage system features advanced temperature control design, high-density ...

Liquid cooling energy storage technology, with its superior performance in thermal management, safety, and space utilization, is becoming an indispensable part of modern energy systems.

Liquid Cooling Containerized Energy Storage Features SAFE AND RELIABLE Approved industry certification of Cell pass test by UL/TUV/IEC Multi-level design for fire control

The 5MWh liquid-cooling energy storage system comprises cells, BMS, a 20"GP container, thermal management system, firefighting system, bus unit, power distribution unit, wiring harness, and more.

Supports multi-level parallel connection, bottom busbar design, maximizing land space utilization.

A liquid cooling unit is a specialized device designed to regulate temperature within energy storage systems, primarily batteries. Unlike air cooling, liquid cooling offers higher...

Designed for safety, efficiency, and fast deployment, these plug-and-play systems are ideal for solar + storage, peak shaving, microgrids, and backup power needs. Certified for global standards, GSL's ...

It provides temperature control for energy storage batteries and temperature-sensitive equipment. The unit offers comprehensive functionality, supporting RS485 or CAN communication with a host ...

The HJ-ESS-EPSL Series is a high-capacity liquid-cooled containerized energy storage system for large-scale industrial, commercial, and utility applications.

Discover GSL Energy's advanced liquid cooling energy storage systems for commercial and industrial

Energy storage horizontal liquid cooling unit

applications. Scalable to 5MWh, certified by UL, CE,CEI and IEC. Improve energy efficiency, ensure ...
