Abstract The choice of energy storage is the key content of the energy storage plan and design to participate in the primary frequency regulation of new energy.

This paper presents the concept of overall power system reliability evaluation using an educational test system. The paper extends an existing test system by developing the necessary distribution and...

Furthermore, simulation experiments are conducted using real historical data from an industrial park to investigate the practical benefits of adopting a selected ESS-sharing scheme in ...

In this paper, a total of 10 energy storage technologies of energy-type energy storage and power-type energy storage are selected to form an evaluation scheme. Subjective weight ...

In summary, in the current energy storage configuration research, the selection scheme of HES still lacks a reasonable evaluation method, and it is difficult to fully compare the technical characteristics ...

Firstly, based on the perturbation theory, we solved and obtained the equivalent single-converter subsystem, which can represent the system strength of the heterogeneous multi-CBR system ...

o An evaluation method to realize the selection of HES schemes is presented. o The power supply reliability improvement effect of selection results is verified.
