Need Help with a Custom Lithium Battery Pack? From design to production, our team of experienced engineers at Epec is here to help you design a custom lithium battery pack that exceeds your needs.

The project will utilize advanced lithium-ion battery technology to store excess energy generated from renewable sources during periods of low demand and release it when demand is high or when ...

We specialize in designing and manufacturing hassle-free and cost-effective custom lithium battery packs, 18650 or 21700 battery packs, LiFePO4 lithium battery packs, or high & low-temperature ...

By approaching specialized lithium-ion battery development as a cross-functional engineering challenge requiring rigorous validation, companies can successfully build custom packs unlocking unique ...

Lithium-ion battery pack manufacturing process includes separate cell sorting, assembly, and insulation stages to ensure high performance, safety, and longevity for all of our custom rechargeable battery ...

Whether you need a standard 18650 configuration or a fully customized lithium-ion solution, our team will create a reliable, high-performance battery pack designed to power your products safely and efficiently.

Our custom battery packs are applicable to UPS battery, AGV battery, medical battery, off-grid solar battery, golf carts battery, emergency light battery, solar light battery, starter battery, energy storage ...

Recently we designed 24V10Ah and 24V20Ah LTO battery packs for our Estonian customer. The battery packs are used for a bridging/buffer battery for inverter and unstable secondary DC power source.

Professional-grade custom lithium battery packs featuring advanced BMS technology, scalable design options, and comprehensive safety systems for optimal performance across diverse applications.
