Get breaking news, in-depth articles and press releases covering Battery Tech in the EV industry.

With 2025 numbers in and the more basic US EV sales reports out, now is the time for one of my favorite topics of exploration -- how fast different automakers are electrifying.

It was pretty refreshing to see automakers put some elbow grease into EVs, especially as government subsidies fade out and EV adoption is expected to cool down for a while.

2026 will be make-or-break for Honda and Acura's EV ambitions. Honda has never built a long-range EV for the U.S. market, and its global EVs have so far been middling.

News, analysis, insights and reviews of electric vehicles, electric infrastructure and the EV industry.

We don't just publish the breaking news of the day, but go behind it, create it, and most importantly, examine the how, what and why of electric vehicles.

NewsNow aims to be the world's most accurate and comprehensive aggregator of electric car news, covering the latest hybrids, batteries, electric vehicles, hydrogen cars and more from the best online ...

The average transaction price of a new car has skyrocketed to around \$50,000, while new EVs are hitting a high of \$59,125. Those same dealerships are now noticing it in their sales trends.

Read the latest EV news from the U.S. and around the globe including new model reveals, business news, industry insights, latest technology, and more.

The world's biggest automotive markets are in fight-or-flight mode right now. While China is pushing forward with EVs, the U.S. has all but pulled federal support for them.
