How do I get an EV charging point installed?

Contact your local council to get a car charger installed. The government is actively promoting the availability of on-street EV chargepoints in residential streets where off-street parking is not available. How much does EV charging point installation cost?

How do I choose the best EV home charging unit?

With a variety of EV home charging units on the market, it can be hard to narrow down your choice. Some key considerations to help guide your decision include: Charging rate. Your charging rate will be limited by that of your electric vehicle and the charging point itself.

How fast can you charge an EV at home?

The speed at which you can charge your EV at home will depend on your car (the maximum rate of charge it can accept), and your charger. Most homes can charge a car up to 7.4kW- or more simply, overnight whilst you sleep. Cord EV chargers are 7.4kW.

How much does a home EV charger cost?

Suitability: whether your home's electric supply can cope with an EV charger. How much does an EV charger cost? Government grants for EV chargers have all but disappeared, meaning it now typically costs between £450 and £1,200 to buy and install a home EV charger. The difference in cost is largely down to the amount of power it can supply.
