-----  
How many employees does Fiberhome Fuhua have?

The company employs 200 people, with a technical team of 100, accounting for 50% of the staff. FiberHome FuHua, established in 2008, is a leading manufacturer and solution provider in Smart Energy and Smart City.

Who is Fiberhome Fuhua?

With a decade-long dedication to continuous innovations, FiberHome FuHua has built its leading role in R&D investment and product design. We have also built a strong connection with partners from different sectors throughout China including the government, education, medical, and transportation.

Who is Fiberhome Fuhua partnering with?

Fiberhome FuHua has established a strategic alliance with multiple academic institutions, including Tsinghua University, Wuhan University, the Chinese Academy of Sciences and other educational institutions.

China Energy Storage Series Products catalog of 5kw Single Phase Hybrid Inverter Solar Use Residential Energy Storage Bess, 10kw Three Phase Hybrid Inverter Solar Use Residential Energy ...

We provide series of power-related products, including EV charging stations, portable power stations, ESS (energy storage system), UPS (uninterruptible power supply), lithium batteries, micro-grid ...

This product uses a zero-capacity-increment, flexible smartcharging pile as the energy storage and charging system carrier.

Hybrid power station energy system is a comprehensive energy station platform built around photovoltaic subsystem and energy cabinet system.

Residential small-scale PV inverter is a core power conversion device for household distributed photovoltaic systems, specifically designed for residential scenarios (typically with a ...

With modular design, it integrates lithium ironphosphate battery cabinets, battery management system (BMS), power conversion system (PcS), DC-DC charging system, local control ...

# FiberHome Photovoltaic Energy Storage

The pure photovoltaic solution supplies power through photovoltaic power generation + lithium battery, and maximizes the use of solar energy by intelligently switching working modes ...

The photovoltaic and diesel solution uses photovoltaic power generation + diesel engine + lithium battery to supply power, which maximizes the use of solar energy.

Delivers complete, flexible solutions (S-Campus & S-Home) tailored for a wide range of commercial, industrial, and residential solar applications.
