Built from aircraft-grade aluminum, this racking system supports a fixed 15° tilt angle, making it ideal for high-efficiency flat roof or ground-mounted PV installations. The no-penetration design allows ...

The fixed 15° design provides optimal year-round energy production across most of the United States, and its adjustable module height feature ensures excellent ground clearance and efficient snow ...

The cost for fifteen solar racks typically ranges from \$1,500 to \$4,500, depending on various factors. These include the type of material used, the size of the racks, and the specific ...

Fixed 15° ballasted ground mount solar module racking system with 0° hurricane setting that is capable of withstanding wind speeds of 200+MPH.

15° Universal Ground mount frame that is designed to rack any size solar module and can be mounted almost anywhere with four available mounting options. The IR-15 System utilizes our own IR-F2 solar ...

The IntegraRack IR-15 is a scalable, DIY-friendly racking system for any size solar array. These racks can be secured with innovative anchoring systems such as EarthBallast, AnchorSpike, Concrete ...

Built from aircraft-grade aluminum, this racking system supports a fixed 15° tilt angle, making it ideal for high-efficiency flat roof or ground-mounted PV installations. The no-penetration ...

15° Universal Ground mount frame that is designed to rack any size solar module and can be mounted almost anywhere with three available mounting kits, or by ballasting the frames with a flat water tank ...

Designed to support solar modules of most sizes, even 700W jumbo panels, the IR-15 ensures optimal year-round energy production with its fixed 15° sun angle. Built to withstand hurricane force winds of ...

Fifteen solar racks

Perfect for those seeking DIY solar installation without sacrificing durability, the IR-15 BallastRack(TM) sets a new standard for off-grid and hybrid solar projects.
