-----  
Should you install photovoltaic systems on a flat roof?

When it comes to installing photovoltaic systems on flat roofs, novotegra flat roof systems are the right choice. All solutions in the flat roof product family offer safety, stability, and are easy to install, making them the perfect solution for every flat roof.

How do PV flat roof mounting systems work?

PV flat roof mounting systems work by being fixed to the roof with ballast blocks. Each location requires individual ballasting. The novotegra systems achieve optimized ballasting through their aerodynamic design and realistic wind tunnel tests carried out from all sides.

Which PV system is best for a flat roof?

For flat roofs, the "allrounder" is an ideal PV mounting system. It provides an optimum elevation angle of 13°; for good efficiency and self-cleaning, and requires little to no ballasting with stones due to its optimised aerodynamics.

What are PV substructures for flat roofs from novotegra?

The PV substructures for flat roofs from novotegra are characterised by their high degree of flexibility.

With the COMPACTFLAT S system, we revolutionized the world of PV substructures. We challenged the standard rail substructures on the market and designed substructures based on aluminum brackets, ...

The CompactFLAT S system by AEROCOMPACT is an innovative bracket-based photovoltaic (PV) mounting solution designed for flat roofs. It features aluminum brackets that offer lightweight and ...

The Renusol CS60 solar roof mounting system offers easy installation ...

The Renusol CS60 solar roof mounting system offers easy installation for most current PV modules and is an innovative one piece solar mounting system for flat roof applications.

A ballasted flat roof solar mounting hardware does not require any roof penetrations for mounting the solar panels. The non-penetrating ballast flat roof solar mounting system can easily be used as a ...

## Flat-pad photovoltaic bracket

All Sun Ballast solutions enable photovoltaic plants to be implemented on any type of flat surface, from small tiled roofing on homes and blocks of flats through to large roofs with membranes on industrial ...

Customizable support for any roof. Fully certified. Adding solar to a flat roof has built-in complexity and requires a wide array of options to meet the building requirements--such as a mechanically attached ...

Optimize solar energy on flat surfaces with non-penetrating ballast systems or adjustable tilt brackets. Designed for commercial & residential roofs, our solutions withstand 60m/s winds and 1.4KN/m<sup>2</sup>; ...

Customizable support for any roof. Fully certified. Adding solar to a flat ...

The adjustable bracket system is an ideal solution for installation on sloped roofs. It has greater flexibility, so that the installation angle of solar panels can be within the range of 10-15°, 15-30°, and ...

When it comes to installing photovoltaic systems on flat roofs, novotegra flat roof systems are the right choice. All solutions in the flat roof product family not only offer safety and stability, but are also easy ...

Learn about the variety of options for mounting solar panel systems on to Flat roofs including flashings, posts, seals, or ballast-trays from IronRidge, UniRac, QuickMount PV, Chemlink, ProSolar.
