In April, Georgia Power received permission from the Public Service Commission to forgo the typical bidding process and get right to constructing energy storage to support limiting the use of ...

Georgia Power has applied for certification of four battery energy storage sites totaling 500 MW expected to come online in 2026.

Financed through an Asian Development Bank (ADB) loan and implemented by the Georgian State Electrosystem (GSE), the project involves constructing a 200 MW / 200 MWh lithium ...

In direct alignment with critical load demand, Georgia Power is executing a strategy to integrate BESS capacity. The largest electric utility in the state is undergoing a transformation with ...

As Georgia Power continues to innovate and invest in battery storage, we are not only meeting the energy needs of today but also paving the way for a cleaner, more resilient, and more ...

We work closely with Georgia's universities to identify cutting-edge research regarding energy storage and provide companies with access to the latest applied research.

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC), Georgia legislature, and Talbot and Muscogee counties on Thursday to mark ...

From coal plant conversions to solar co-location, Georgia Power's battery strategy highlights the evolving role of storage in utility-scale energy planning.

If you've ever wondered how the Peach State plans to keep its sweet tea chilled during a heatwave while slashing carbon emissions, look no further than Georgia energy storage battery systems.

Georgia lithium battery energy storage cabinet energy

US-based electric utility Georgia Power has commenced construction of new battery energy storage systems (BESS) across the state of Georgia, totalling 765MW capacity.
