According to the report, 2024 was another record year for solar PV, with between 553 GW and 601 GW newly installed worldwide.

In the last decade, solar has grown with an average annual rate of 26 percent, reaching a capacity of over 138 gigawatts in 2023. In that same year, solar energy accounted for 55 percent of ...

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry.

Continuous advancement of several photovoltaic components including mounting structures, solar cells, battery, modules and others along with robust government aided investments to scale up the ...

Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. It allows homeowners, small building owners, installers and manufacturers to ...

Data for November 2025 Release Date: January 26, 2026 Next Release Date: February 24, 2026 Full report PDF Go Back Previous Issues SAS Output Table 1.1.A. Net Generation from ...

Learn the solar panel output for major brands and panels, and how it affects the type and size of system you might end up installing.

Solar accounted for 58% of all new electricity-generating capacity added to the US grid through the third quarter of 2025, with more than 30 GW installed. Solar and storage, combined, ...

Solar energy can be harnessed two primary ways: photovoltaics (PVs) are semiconductors that generate electricity directly from sunlight, while solar thermal technologies use sunlight to heat water for ...

Home Solar Photovoltaic Power Generation Report

Solar energy in the United States is booming. Along with our partners at Wood Mackenzie Power & Renewables, SEIA tracks trends and trajectories in the solar industry that demonstrate the diverse ...
