In that last year, the global solar PV chain reached an industrial business value of some 104.7 billion U.S. dollars, with China dominating the market, and followed by the United States and...

Overall, solar panel manufacturing revenue has swelled a CAGR of 2.7% to \$21.4 billion in 2025, including a 6.6% jump in 2025 alone. While upcoming expirations and restrictions on federal tax ...

Solar manufacturing investment has grown substantially since the IRA became law, increasing from \$0.9 billion of annual investment in 2022 to nearly \$6.0 billion in 2024.

Since Biden enacted the IRA, solar companies have staked over \$34 billion for US factories, according to the Solar Energy Industries Association, with over 39,000 new factory jobs ...

Over 10,000 solar companies across U.S. states are responsible for this employment, with workers with a wide variety of backgrounds and job functions supporting the solar industry. In addition, the ...

Global cumulative investment in solar PV manufacturing facilities doubled in the past decade amounting USD 100 billion in 2021 increasing by 50% during 2014-21 as compared to 2008-14.

This map provides information about all of the solar photovoltaic (PV) manufacturing facilities in the United States and how they contribute to the solar supply chain.

New solar PV manufacturing facilities along the supply chain could attract USD 120 billion investment by 2030. Annual investment levels need to double throughout the supply chain.

Manufacturing Renaissance: US solar manufacturing capacity has grown 190% year-over-year in 2024,

How many billions of investment are there in photovoltaic panel assembly factories

reaching over 51 GW annually--enough to meet nearly all domestic demand while ...

Solar PV manufacturing capacity and production by country and region, 2021-2027 - Chart and data by the International Energy Agency.
