How much does a battery storage project cost in Australia?

According to TrinaSolar that cost will total just \$400 million. The company clarified to Renew Economy that this \$400 million reflects only the first 330MW/1.32GWh stage of the project - but it still appears to set a new low for battery storage project costs in Australia.

Are batteries cheaper to build in Australia?

Batteries in Australia have become cheaper to build. But what is the scale of the cost decrease, and will the trend continue in the future?

Why are batteries so expensive in Australia?

Per kilowatt of power, batteries in Australia (in both the NEM and WEM) have increased in cost over time. But this is due to more recent projects being longer-duration: while the first Australian batteries were at one hour of duration or less, two-hour and four-hour batteries are now the norm.
