Should you invest in an uninterruptible power supply (UPS)?

When considering the investment in an uninterruptible power supply (UPS), it's crucial to evaluate UPS price points meticulously. The market offers a range of UPS solutions catering to diverse business needs and budgets.

What is an uninterruptible power supply?

Read more about our editorial standards. An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter-- which turns the battery's stored energy into usable power -- in one.

Why do people buy uninterruptible power supplies?

Uninterruptible Power Supplies aren't just for your computer, although that's the most common reason people buy them. They're also quite handy for keeping other hardware in your home online in the face of power disruption events like blackouts and brownouts.

Do uninterruptible power supplies use lithium-ion batteries?

Unlike the batteries in other devices around your home, like your smartphone and Bluetooth speakers, Uninterruptible Power Supplies don't use lithium-ion batteries. The batteries in your UPS are lead-acid batteries, like the battery in your car.

Who this is for An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter -- which turns the battery's stored energy into usable power -- in one.
