Derived objects are those that are constructed based on the information already available in the blockchain blocks and transactions - i.e., Accounts, Aliases,

Explore our free data and tools for assessing, analyzing, optimizing, and modeling technologies. Search or sort the table below to find a specific data source, model, or tool.

Learn how high-quality solar, meteorological, and environmental data enhance solar project assessments and ensure optimal design and efficiency.

The `sign.sh` command line tool, included in this release, calls a small Java application `nxt.tools.SignTransactionJSON`, which even though uses Nxt code, avoids initializing any ...

Based on analysis of energy flow behavior in previous subsections, three key design metrics, i.e., service outage probability, solar energy utilization efficiency, and mean depth of ...

Aliases http API cleanup. There are only two API requests to get aliases now: `getAlias` parameters: either `"aliasName"`; (the alias name) or `"alias"`; (the alias id) returns: full Alias JSON ...

The proposed approach facilitates an accurate, cost-optimal PV-battery configuration that meets outage probability requirements and aids in site design for regions lacking historical solar ...

In this comprehensive guide, we explore how data analytics and business intelligence empower solar energy projects, the challenges faced in interpreting large datasets, and the strategic advantages ...

Animated characters for video madfox Newbie Karma: +1/-0 Offline Posts: 5 Animated characters for video « on: August 29, 2016, 12:25:30 pm »

How to analyze base station solar energy data

What is the supernet asset? #171; Last Edit: September 27, 2014, 05:19:38 pm by cobaltskky, Reason: split from official disbursement thread #187; Logged cobaltskky Hero Member Karma: +226/-138 ...

By analysing and interpreting vast amounts of data, data analytics in solar energy allows companies to optimise power generation through real-time monitoring of solar components, predictive ...

Our work aims to introduce a comprehensive framework for optimizing the design and operation of solar-powered cellular base stations (BSs), addressing critical challenges related to energy harvesting, ...
