Our facility specializes in processing end-of-life PV modules, maximizing recovery of recyclable materials. Safeguard the planet by recycling your scrap solar panels with us.

Implementing a systematic method for dismantling solar panels is critical to achieving safe and environmentally sound outcomes. Before starting the dismantling process, safety measures must ...

However, as these photovoltaic solar panels reach the end of their service life, they present a new challenge: how to dispose of waste photovoltaic solar panels and recycle?

Learn the full scope of solar decommissioning. Key topics include panel recycling, dismantling best practices, and calculating cost estimates for PV facilities.

As solar installations expand globally, we face a new, important challenge: managing photovoltaic (PV) modules at the end of their operational life. This guide will help you understand the ...

When solar panels are not recycled, they may be stored indefinitely, exported without oversight, or disposed of in landfills. Over time, broken panels can release materials that are better managed ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn ...

The following assessment is meant to guide PV asset managers and resellers who wish to responsibly manage decommissioned PV modules. It provides general recommendations to assess ...

Transforming scrap solar photovoltaic (PV) panels from potential waste into treasured resources is a key step in driving the renewable energy sector towards a sustainable circular economy.

How to deal with scrapped photovoltaic panel equipment

Proper recycling and getting rid of solar panels, batteries, inverters, and other accessories can ensure maximizing the value of your solar equipment by preserving valuable resources, while at ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. Learn about this renewable energy waste, ...
