The power cord that came with my FT-8900R was longer than I needed so I made this adapter by cutting off the end furthest from the radio six inches from the fuse and installed a Powerpole connector.

A power supply that suddenly provides higher than acceptable voltage will coax the magic smoke out of your radio. A power supply that generates a lot of electrical noise may affect other ...

This article focuses on the three parts of switching power supply: "types and usage scenarios, configuration principles and algorithms, and daily management and maintenance".

Luckily, MORNSUN has a series of power solutions designed to provide state-of-the-art reliability while also curbing any unnecessary costs related to their installation, application, and maintenance of ...

Building better power supplies for 5G base stations Authored by: Alessandro Pevere, and Francesco Di Domenico, both at Infineon Technologies Infineon Technologies - Technical Article 2022

Every switching power supply will generate high frequency trash, some more than others, that may show up on the frequency you want to operate on. The adjustment allows you to change the internal ...

I would suggest a dedicated power source with the 13.8V 30A capabilities. Try to use a meter to see exactly how much output wattage your getting now just to see. The radio you have should be putting ...

These tools simplify the task of selecting the right power management solutions for these devices and, thereby, provide an optimal power solution for 5G base stations components.

The optimal voltage level for different supply distances is discussed, and the effectiveness of the model is verified through examples, providing valuable guidance for optimizing ...

How to modify the base station power supply for better use

For their PSU suppliers, a key design challenge is minimizing the power consumption during this quiescent period. The PSU must also be ready to immediately power up, so the radio can ...

I use a pretty basic tree structure. My main APC is usually near the airlock and power collection area. Each room gets an APC near the door closest the root of the tree, so I can easily ...
