Rising above the clouds, the Huaneng Nagu Solar Power Station harnesses the sun at 5,300 meters, promising cleaner energy for 52,000 households and a greener planet.

After the project is put into operation, it can provide over 253 million kilowatt hours of clean electricity annually, which is equivalent to saving 78,100 tonnes of standard coal and reducing 210,500 tonnes ...

The first phase of the Huaneng Nagu Photovoltaic Power Station, the world's highest solar power project, was officially linked to the state grid in Deqen Tibetan Autonomous Prefecture in ...

On August 23, China Huaneng successfully built and put into operation the world's first 5MW commercial-level perovskite photovoltaic pilot base in the Gonghe Photovoltaic Park, Qinghai ...

China's Huaneng Group has switched on a 250 MW solar plant collocated with a 250 MWh energy storage system in Tibet, marking a milestone in high-altitude renewable energy deployment.

The Huaneng Nagu Photovoltaic Power Station is a part of the Huaneng Lancang River integrated clean energy base. It is situated in the high-altitude, frigid, and uninhabited region of Deqen...

The project features China's first non-overtopping floating offshore photovoltaic platform, engineered to survive once-in-50-years sea conditions and up to 10-metre waves.

Located in the extremely cold and uninhabited area of Deqin County, Deqen Tibetan Autonomous Prefecture, the Huaneng Nagu Photovoltaic Power Station is an important part of the ...
