Our professional R& D team focuses on meeting the individual needs of our clients, tailored to create efficient and stable battery solutions that facilitate the successful implementation of projects.

Linzhou Fengyuan's 300MW/1000MWh hybrid storage project offers a blueprint [1]. By combining lithium iron phosphate and vanadium flow batteries, they've achieved 92% round-trip efficiency - 8% higher ...

With global energy storage capacity projected to grow 15-fold by 2040 according to BloombergNEF, EPC (Engineering, Procurement, Construction) has become the backbone of this ...

Discover the world's biggest battery storage projects of 2025, including BYD's 12.5 GWh system in Saudi Arabia, Grenergy's 11 GWh Atacama project, and more shaping the global energy transition.

The project adopts an engineering, procurement and construction (EPC) turnkey contract model including operation & maintenance (O& M) services. The site in Ulanqab, central Inner ...

This standalone battery storage project comprises 100 lithium iron phosphate (LFP) energy storage units. It employs an innovative split approach, with half the systems utilizing grid ...

We develop, manufacture and sell industrial, commercial and household energy storage cabinets is also covered industrial and commercial photovoltaic EPC, power plant development, ...

Located 41 kilometers east of Kashgar, Xinjiang, the project spans 119,000 square meters and represents a total investment of approximately CNY 1.6 billion (\$222.9 million). The facility...

It involves the planned construction of one 200MW/800MWh lithium iron phosphate (LFP) electrochemical

Huazhong Lithium Battery Energy Storage Cabinet Three-Phase Project EPC

energy storage station and one 220kV collection station. The project utilizes a ...

Owned by state-owned infrastructure giant PowerChina, this project is touted as the world's largest power generation-side electrochemical energy storage system- meaning it is co ...
