Yes - east/west facing panels will typically generate less than southern facing panels, but if you don't have a southern exposure, east/west is a perfectly acceptable configuration.

Yes, most solar panel installations require permits. Whether you're installing rooftop panels or a ground-mounted system, local building departments typically require permits to ensure ...

Here's the data-driven truth about solar panel orientation that the industry doesn't want you to know. Here's a surprising reality: Two identical homes on the same street install the exact ...

There are special requirements for labeling, sizing of the panel, and even the placement of breakers within the panel. Builders need an interconnection agreement with the local utility in order to activate ...

Is It Worth Installing Solar On A West-Facing Roof? Yes, especially when household evening demand is high, TOU rates favor afternoon production, or roof orientation limits other options.

Take bifacial modules - these double-sided wonders can squeeze extra 8-12% output from western exposure by harvesting reflected light. Pair them with optimized tilt angles (we recommend 25-30°; for ...

Discover smart solar panel installation tips for small spaces! Learn how to maximize energy production with space-saving solutions, from vertical mounts to efficient panel selection.

I chose to cover all but the north face of my roof (live in the Chicago region) with panels to max out potential energy production. I can't fit anymore panels on the roof, but when we rebuild the garage I'll ...

While installing solar panels entirely by yourself isn't recommended, there are several components of the installation process you can handle safely and legally. You can perform initial site ...

Is it okay to install photovoltaic panels in a small western-style building

Discover how zoning laws shape solar panel placement by influencing installation locations, sizes, and designs. Learn to navigate local regulations, secure permits, and balance aesthetics with efficiency to ...
