IESR reveals the potential of green hydrogen as a key to decarbonizing industry and transportation at IETD 2025. Gain insights into clean hydrogen projects, regulations, and investment ...

The roundtable discussion aimed to explore Indonesian industries' readiness to adopt green hydrogen technologies, Indonesia's strategies and regulatory landscape for green hydrogen ...

Today, 21 Green Hydrogen Plants were officially launched. The Ministry of Energy and Mineral Resources appreciates PLN's efforts in accelerating the achievement of Net Zero Emissions ...

BoxPower's flagship SolarContainer is a fully integrated microgrid-in-a-box that combines solar PV, battery storage, and intelligent inverters, with optional backup generation. [pdf]

Located within the site of the Muara Karang gas-fired power plant in Jakarta, the new facility is expected to produce around 51 million tonnes of green hydrogen annually via electrolysis.

The core consists of three parts - photovoltaic power generation, energy storage batteries, and charging piles. These three parts form a microgrid, using photovoltaic power ...

Indonesia celebrates a milestone as the country unveils its inaugural Green Hydrogen Plant in Jakarta, offering a sustainable, eco-friendly energy solution with global implications.

Indonesia targets to become a hydrogen supplier in the global market with the country's first green hydrogen plant, built by PLN (Persero), which commenced production earlier this month.

One of the important innovations of the Kamojang Geothermal Power Plant is the packaging of green hydrogen in high-pressure cylinders, ensuring its safety during the shipping process to various ...

Jakarta Photovoltaic Hydrogen Production Container

PLN has already been very proactive in initiating hydrogen pilot projects and studies across Indonesia, including the establishment of hydrogen production facilities and refuelling stations.
